## II. Read the following text and answer questions 3 and 4.

*A sport that was mostly invented in the United States, baseball is considered a big part of the USA's history and culture. Baseball is often called the "National Pastime" of the United States. Baseball is different from many other major sports, like basketball and football, in that there is no clock. This gives baseball a slow, methodic pace that is unique and also is ideal for long, lazy summer days when the game is played. Strategy and subtlety are key elements to winning games. Baseball also has a rich history of unique players and personalities that have become household names. Some of these players include Babe Ruth, Joe DiMaggio, Hank Aaron, and Jackie Robinson. Baseball's long history, heroic players, and rich game play have made it one of the world's most popular sports.*
